SUMMARY

Robotics and Automation graduate with expertise in developing intelligent robotic systems, combining simulation, control, and autonomy. Focused on advancing innovative solutions in robotic design, navigation, and real-world deployment.

EDUCATION

Bachelor of Engineering in Robotics and Autmoation

8.0/10.0

D. Y. Patil College of engineering

December 2021 - June 2025

Pune

Higher Secondary Education

87.4%

Narayana Junior College

2019 - 2021

Hyderabad

Secondary School Education

79.6%

Prodigy Public School

2017 - 2019

Pune

EXPERIENCE

Project Intern

3D Wizard

September 2024 - February 2025

Pune

- Worked on 3D printing projects and contributed to the development of a large-scale 3D printer.

Robot Engineer

BotMakers

January 2024 - June 2024

Pune

- Built competition robots like line followers, tasking bot and maze solvers, volunteered in robotics events and workshops.

PROJECTS

eYantra AstroTinker bot

FPGA, Verilog, Fusion, Sensor Integration, UART, ModelSim

https://github.com/pratham280/astrotinker_eyrc

Built the AstroTinker bot for IIT Bombay's eYRC, focusing on autonomous navigation, sensor integration, and task-based robotic control.

Quadruped Robot aka "Sheru"

ROS, Rviz, Git, Inverse Kinematics, Gait Motion, 3D Printing

https://github.com/pratham280/Quadruped_Sheru

Developed a quadruped robot as my Final Year Project using ROS2 with simulation in Gazebo/RViz, integrating sensors and control algorithms for gait motion, obstacle avoidance, and autonomous navigation.

Omni Bot

ROS2, Gazebo, URDF/Xacro, Joystick teleoperation, Holonomic drive control algorithms, Python/C++

https://github.com/pratham280/Omni_bot

Designed an omnidirectional robot with ROS and Gazebo, integrating joystick control, LiDAR, and holonomic drive for flexible navigation.

SKILLS

Git

ROS

Rviz

Isaac sim

URDF

Problem Solving

Python/C

Gazebo

Linux
